Muhammad Sudais

FrontEnd Developer

+92 319 9439818 | Swabi, Pakistan | github.com/sudais122 | sudais023@yahoo.com | linkedin.com/ in/muhammad-sudais

Summary

Frontend developer with 2 years of experience building responsive and user-friendly web applications using HTML, CSS, JavaScript, and React. Skilled in creating clean, intuitive interfaces and improving user experience through modern frontend practices. Proven problem-solver with a competitive edge, having secured 1st position in two hackathons. Passionate about continuous learning and delivering high-quality, performance-driven web solutions.

Projects

Complaint Management System

Supabase, Express.js, HTML CSS, Node.js, JWT, bcrypt

- Developing a full-stack Complaint management system for university students to track and report issue.
- Implement secure authentication using JWT and bcrypt with OTP base email verification .
- Built an admin dashboard to manage complaints, forward issues, and monitor status with real-time updates

Trust Scan

HTML, CSS, JavaScript, React.js, Node.js, Supabase

- Developed a web-based system to detect and report online scams by analyzing phone numbers.
- Implement a risk scoring engine (0–100) based on keyword analysis, report frequency, and severity indicators..
- Designed a scam reporting system allowing users to submit fraud cases, dynamically updating risk scores.

SehatDost

React.js, Vite, HTML, CSS, React.js (JSX),

- Developed a comprehensive healthcare platform enabling doctor discovery, appointment booking, and access to hospitals, labs, medicines, and disease information.
- Designed and implemented advanced UI/UX flows for doctor search, appointment booking (online & in-clinic), and lab test scheduling.
- Created community-driven features such as blood donation system, Q&A medical forum, and emergency blood request management.

Education

Abdul Wali Khan University — BS Software Engineering

Mardan • 2024 - 2028

Technical Skills

Frontend

HTML, CSS, JavaScript (ES6+), React.js (JSX)

Tools: Git, GitHub, VS Code

Certifications & Achievements

- **Secured** 1st Position **in the *AI & Tech TFV Prototype Competition* by designing and presenting a functional prototype with strong problem-solving approach and technical implementation**
- Achieved **2nd Position** in a competitive hackathon organized by the *Bits & Bytes Society*, developing a real-world solution under time constraints using modern web technologies.
